

LEGACY SYSTEM MIGRATION CHECKLIST

Step 1: Audit What You Have

Map your current system to understand its problems.

- ☐ List all tools and technologies in use
- ☐ Identify performance, UX, or security issues
- ☐ Note data and integration touchpoints

Step 2: Define Your Migration Goals

Decide what success means for your business.

- ☐ Speed up content updates
- ☐ Improve scalability
- ☐ Reduce maintenance costs

Step 3: Plan and Migrate Gradually

Avoid downtime with a well-defined roadmap.

- ☐ Choose the right tech stack for you
- ☐ Back up everything
- ☐ Validate redirects and SEO continuity

Step 4: Optimize, Test, and Support

Fine-tune performance, Core Web Vitals, and usability.

- ☐ Test all integrations
- ☐ Verify 100% green Core Web Vitals
- ☐ Monitor results and improve continuously
